

Hi. We're Deft.

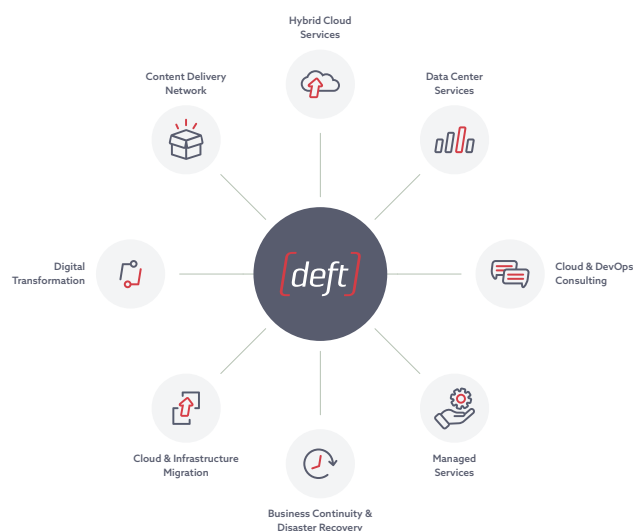

At Deft, formerly known as ServerCentral Turing Group, we are our clients' most trusted advisor. The Deft team humanizes technology. We actively listen to our clients, learning and collaborating to develop tailored solutions that perfectly fit your company's needs. We then design, build, operate, secure, and scale unique technology solutions with a singular purpose: to deftly deliver on the promise of technology for you and your customers.

A Trusted Advisor...

Companies choose us as their Trusted Advisor because:

- We simplify technology transitions to simplify your life
- Our proven ability to guide you through complex tech challenges means you can rely on us for anything
- Our expertise is multifaceted: we're experts in tech, and experts at making you stand out among technology leaders
- We're refreshingly transparent: the only surprises you'll get are good ones
- We flex our services and approach to meet you where you are and take you where you want to go
- We focus on solving your challenges, so you can focus on what matters most

...With Comprehensive Solutions

Working With Us

When you work with Deft, you will notice that we tackle complex challenges differently, revealing connections others can't see. We never go in with a predetermined set of answers. We listen. We learn. And we collaborate to uncover tailored solutions with an unmatched element of humanity. Just a few of the hundreds of companies that have put their trust in us:

A Global Footprint

A Proven Methodology

Growth, modernization, resilience. Today’s critical IT objectives are not realized by what technologies you use. They are realized by how you apply them to your business. No matter what your right answer is, we’ll find it. Together.

Consult

- We begin with a detailed assessment of your current strategy and environment.
- Everything that can impact your business success is accounted for, from technology to process interdependencies.

Plan, Design & Build

- We then build out a detailed cloud strategy that aligns specifically with your desired business outcomes.
- Once aligned, we work with your team to migrate to your environment applying best practices and delivering comprehensive knowledge transfer.

Run & Operate

- Now that your environment is successfully verified and in production, we perform 24x7x365 proactive management, administration, monitoring, and support in line with your business requirements and a detailed responsibility matrix.

Optimize & Evolve

- The final step is the ongoing optimization and evolution of your environment.
- We make sure your environment remains aligned with your business objectives.
- All opportunities are shared directly with your IT and leadership teams to inform strategy and decisions.

How Do You See Us Working Together?

Managed cloud services. Cloud consulting. Cloud-native software development. Business continuity solutions. Managed data center services. How do you see us working together? Give us a call at +1 (312) 829.1111 or visit <https://www.deft.com> and let’s get started.
